

Expansion and checkpoint averaging: all five training seeds

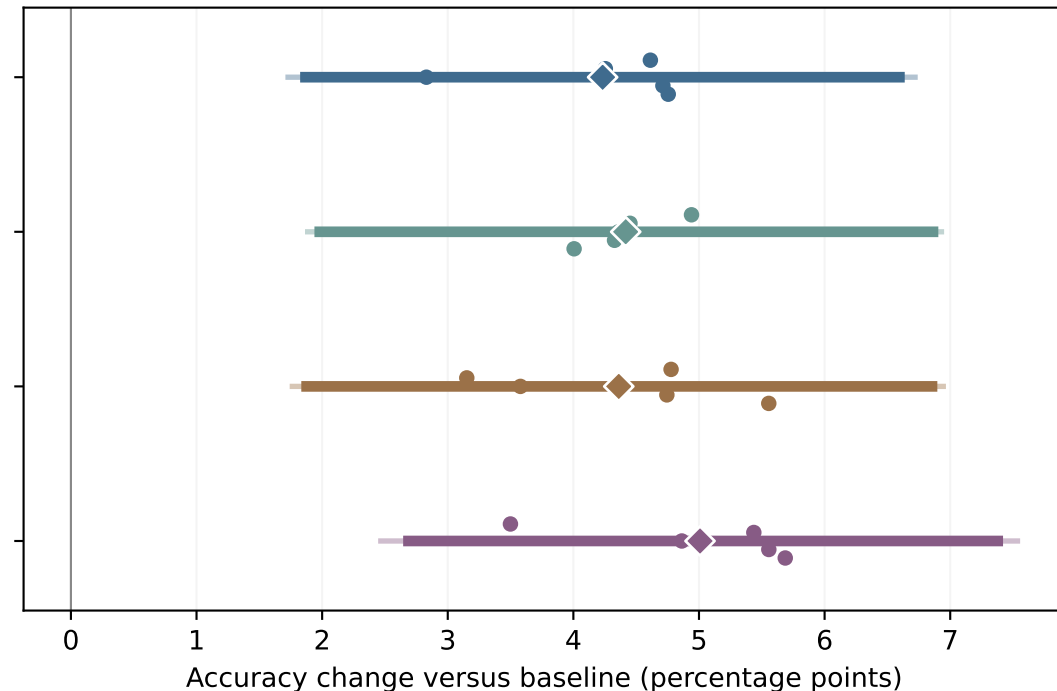

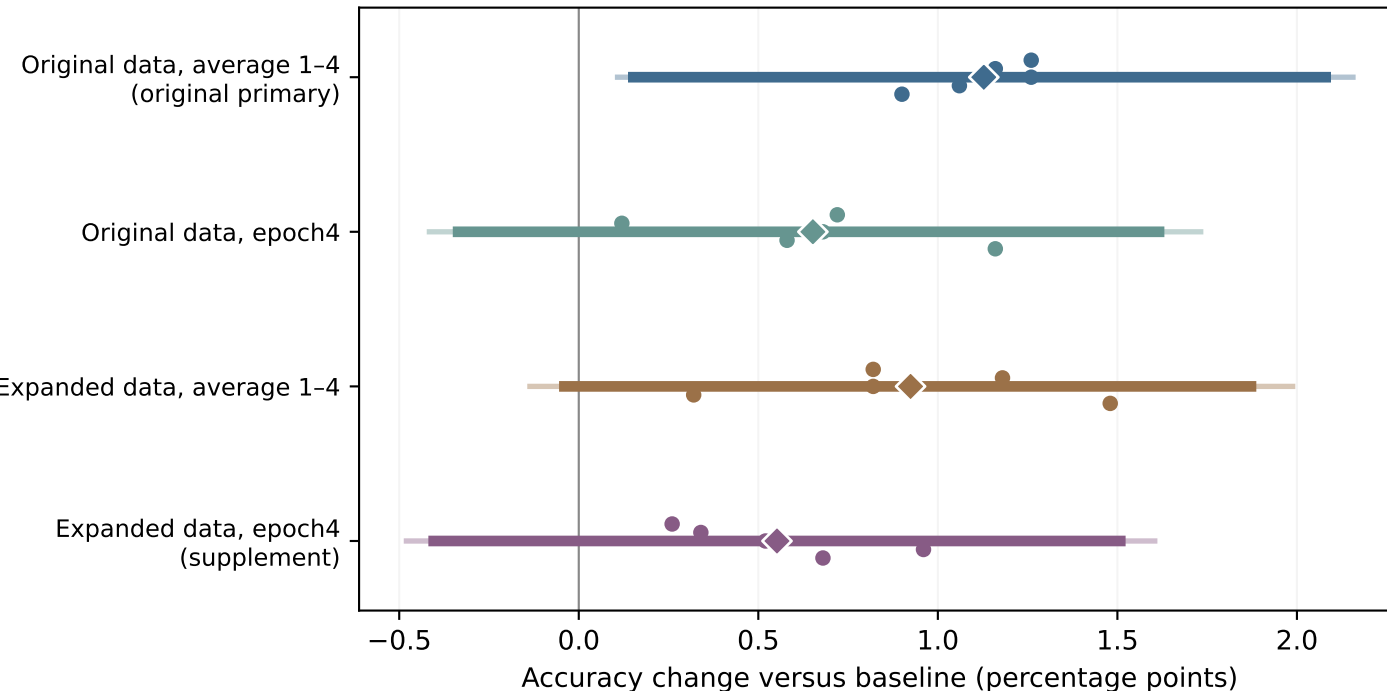

Primary scoring | MATH 5000 (reused)

Primary scoring | Mathematical OOD macro

Strict last-box scoring | MATH 5000 (reused)

Strict last-box scoring | Mathematical OOD macro

Accuracy change versus baseline (percentage points)
Dots: seeds43-47. Diamond: mean. Dark bar: paired-question95%CI. Pale bar: seed/question95%CI.
Minerva numeric repair applied; secondary comparisons exploratory. Strict OOD gains depend strongly on missing-box penalties.
